SUMMARY

Computer Engineering graduate in De La Salle Lipa with experience developing web applications, databases, and user interfaces through academic and internship projects. Skilled in JavaScript, TypeScript, React, SQL, Git, and modern development tools, with knowledge of software development, technical troubleshooting, and AI-assisted development workflows. Eager to contribute to software development, QA, IT support, or other technology roles while continuously expanding technical expertise.

SKILLS

- Programming Languages: JavaScript, TypeScript, Java, SQL, C++
 - Web Technologies: HTML5, CSS3, React, Next.js, Tailwind CSS
 - AI-Assisted Development: ChatGPT, GitHub Copilot, Cursor AI
 - Testing & Troubleshooting: Manual Testing, API Testing, Debugging, Hardware & Software Troubleshooting, Basic Network Troubleshooting
 - Backend & APIs: Node.js, Express.js, RESTful APIs
 - Database: PostgreSQL, MySQL, Prisma ORM
 - Developer Tools: Git, GitHub, VS Code, Postman, Figma, Chrome DevTools, Microsoft Office Suite
 - Professional Skills: Problem Solving, Analytical Thinking, Communication, Team Collaboration, Time Management, Adaptability
-

PROJECTS

- Barangay Tiquiwan Document Request System
- Developed a web-based document request platform for barangay residents and administrators.
 - Implemented user authentication and request management.
 - Designed responsive interfaces and administrative dashboards.
 - Improved document request tracking through digital workflows.
- TAP-JEEP (Trip and Automated Payment System for Jeepneys)
- Developed a smart fare collection system using RFID technology.
 - Implemented GPS-based fare computation.
 - Created dashboards for administrators and users.
 - Streamlined fare processing through digital payment workflows.
- COD Machine System
- Developed an Arduino-based automated Cash-on-Delivery (COD) machine.
 - Integrated keypad, ultrasonic sensor, servo motor, LCD, and buzzer.
 - Implemented secure authentication and parcel verification features.
 - Improved delivery efficiency through automated cash handling.
-

EXPERIENCES

- SupSoft Tech – UX/UI Designer Intern
- Designed responsive user interfaces and interactive prototypes using Figma.
 - Collaborated with developers to improve application usability and consistency.
 - Assisted in creating user-centered designs for web and mobile applications.
 - Participated in design reviews and iterative improvements based on feedback.
-

EDUCATION

- Bachelor of Science in Computer Engineering – De La Salle Lipa, 2022 – 2026
- Elementary, Junior, and Senior High School – Sto. Niño Formation and Science School, 2010 – 2022
